# Nro	Funciones	Alternativa 1	Alternativa 2	Alternativa 3	Alternativa 4	Encargado
1	Conector fuente AC	Conector plug	Por Inducción	Pogo Pins		Bonnie
						
2	Convertir AC a DC	Fuente rectificadora no regulada	Fuente rectificadora regulada			Luis
						
3	Cargar bateria	Cargador lineal	Cargador conmutado			
						
4	Almacenar energía	Bateria lipo 3.7 V	Batería li-ion 3.7 V	Bateria Ni-MH		Goran
						
5	Energizar	SPDT switch	Toggle switch	Push button switches		Goran
						
6	Proteger contracorriente	Fusible	Termistor PTC			Jorge
						
7	Proteger contratensión	Varistor	Diodo Zener	Diodo TVS		Jorge
						
8	Sensar nivel de batería	Divisor de tension + ADC	Sensor de corriente + resistencia			Gustavo
						
9	Acondicionar energía	Circuito DC-DC conmutado	Regulador con circuito lineal	PIMC dedicado		Luis
						
10	Mostrar indicadores de encendido, carga y batería	LEDs de colores	LED RGB	Pantalla OLED		Luis
						
11	Capturar video de manos	Cámara RGBD	cámara RGB convencional	Camara RGB-IR		Goran
						
12	Sensar señales musculares	electrodos EMG	sensor FSR + acelerómetro	FMG	MMG	Gustavo
						
13	Procesar y parametrizar video y señales musculares	Microcontrolador	Microprocesador	FPGA		Gustavo
						
14	Enviar datos	Bluetooth Low Energy (BLE)	Wi-fi Iot	Infrarrojo		Bonnie
						
15	Almacenar datos del progreso del usuario	Memoria volátil local (SRAM)	Memoria no volátil (EEPROM/FLASH)	Memoria SSD	Nube	Jorge
						
16	Interfaz del usuario	Interfaz Gráfica del Usuario (GUI) local	Pagina web	Aplicación movil con conectividad local	Interfaz integrada human-machine	Jorge
						
17	Ventilar Hardware	Disipador pasivo	Ventilador activo			Bonnie
